

CABLING

DID YOU KNOW: WHEN CERTAIN TYPES OF CABLES BURN THEY CREATE A TOXIC GAS?

That's just one of the many concerns when planning a data cabling project for business. With an undertaking this large, you need an experienced, trusted and respected partner. Leave the details to the cabling specialists at NIC Partners.

WITH NIC PARTNERS CABLING...

YOU WILL HAVE TRAINED TECHNICIANS AT THE HELM

Our technicians are certified by the cable manufacturers in order to meet the warranty requirements they set. We also guarantee that all of our technicians are cleared and fingerprinted by the Department of Justice so you can avoid security concerns while our staff is on the job.

YOU WILL GET A GENERAL CONTRACTOR ON EVERY JOB

We coordinate the site logistics, ensure that building codes are met at each phase of completion and respond to any hiccups that may arise to ensure a timely, quality job with less hassle and fewer headaches on your part.

OUR STRUCTURED CABLING IS NEVER SUBCONTRACTED

NIC Partners self performs all low voltage structured cabling services. By having our own B, C10 contractor's license we are able to ensure the best work from start to finish.

BENEFITS OF NIC PARTNERS CABLING:

- Certified, factory-trained technicians to complete work within standards and codes and retain warranty status
- Registered, Certified design manager on staff to ensure scalable, evolutionary plan to carry your cabling into the future of technology
- Reduced security staff necessary but maintain full control of transmissions
- We provide motion-based recording platforms that reduce environmental impact
