

BRIDGING THE GAP IN EDUCATION TECHNOLOGY

As a leader in education, you want to provide your students with technology that will spur learning and help them reach their full potential. You know you need technology to help you accomplish this goal. You need a partner who can fill the gap between your desire to educate and a technology system that will work today, while giving you the platform and innovation to scale for the needs of tomorrow.

What if you could work with a technology partner who could identify your needs up-front, provide a custom plan, while mitigating the risks?

What if you could work with a partner who has helped numerous districts navigate through the difficulty of E-Rate, modernization, bonds and government contracts?

NIC Partners works with education and government institutions to help bridge the gap between what technology was intended to do and what you want to accomplish. At NIC Partners, we break down the barriers that make purchases difficult and costly; while providing straight forward solutions to help you feel confident about your next IT project.

WHY ADD NIC PARTNER TO YOUR TEAM?

- For over 17 years, we have worked with education and government institutions to identify and solve technology solutions.
- We are local and that matters. We are experienced enough to matter and small enough to care.
- We're in this together. We want to earn your business and be your partner for years to come. we currently have over 25 schools districts that repeatedly trust us to provide and deliver their technology needs.
